

Mr Simon Harris, T.D.,  
Minister of State  
Office of Public Works

Dear Minister Harris

The Association acknowledges the work being done by you and your office in response to the flooding emergencies that have impacted communities for the past six weeks.

Even before the major flooding events a number of our members asked the Association write to you to request that you would consider favourably invitations from County Councils to come and speak to the elected members directly. The benefit of their local knowledge might be of particular use in the development of effective and precise countermeasures to flooding of specific locations in the country.

We wish you and your team well in your endeavours to deal with the serious and enduring impacts of the inundation.

Yours faithfully

Director
